TITLE	Skin Cancer Education Materials: Selected Annotations.
INSTITUTION	National Cancer Inst. (NIH), Bethesda, Md.
REPORT NO	DHEW-NIH-78-1551
PUB DATE	Feb 78
NOTE	39p.
EDRS PRICE	MF-$0.83 HC-$2.06 Plus Postage.
DESCRIPTORS	Biochemistry; *Disease Control; *Diseases; *Medical Education; Medicine; *Pathology; *Physiology; Science Education
IDENTIFIERS	*Skin Cancer

ABSTRACT

This annotated bibliography presents 85 entries on a variety of approaches to cancer education. The entries are grouped under three broad headings, two of which contain smaller sub-divisions. The first heading, Public Education, contains prevention and general information, and non-print materials. The second heading, Professional Education, contains the following sub-divisions: Epidemiology and Etiology (non-print materials), Clinical Diagnosis and Management, Pathology (non-print materials), Skin Manifestations of Systemic Malignancies (non-print materials), and Treatment. The third heading is Selected General Reference Materials. In addition, author, title, subject, and format indexes are presented. (BB)

DHEW Publication No.
(NIH) 78-1551

This bibliography is intended for use by health care providers and communicators. It contains materials that present a variety of approaches to cancer education. No attempt has been made to evaluate the entries, nor does their inclusion imply endorsement by the National Cancer Institute. To inquire about materials, please contact the source indicated; every entry has been checked for availability, but supplies of some materials may be limited. The Clearinghouse welcomes your comments and inquiries. If you have materials for inclusion in a supplement to this bibliography, please forward them to the Clearinghouse.

Note to the Reader: *Four indices have been provided to facilitate use of this bibliography.*

SKIN CANCER EDUCATION MATERIALS

SELECTED ANNOTATIONS

Public Education

Prevention and General Information

1. **Cancer Factsheet 9: Cancer of the Skin.** 1972. 6 pp; leaflet. Audience: General.

   The causes, types, diagnosis, and treatment of skin cancer are briefly described. **Cost:** free.

   Source: Michigan Cancer Foundation; 110 E. Warren Ave.; Detroit, MI 48201. Telephone: (313) 833-0710.

2. **Cancer of the Skin.** 1973. 4 pp; brochure. Audience: General.

   Causes, risk factors, prevention, precancerous skin conditions, and current research are briefly discussed, along with types of skin cancers, diagnosis, and treatment. **Cost:** free. **Order No.:** 2049.

   Source: American Cancer Society, local units.

3. **Facts about Skin Cancer.** 1974. 6 pp; leaflet. Audience: General.

   Skin cancer is briefly described, including symptoms and prevention. **Cost:** free.

   Source: American Cancer Society, local units.

4. **Progress Against Cancer of the Skin.** Revised 1974. 12 pp; brochure. Audience: General.

   The pamphlet presents a brief introduction to skin cancer, including types, diagnosis, treatment, causes, and research. **Cost:** free.

   Source: National Cancer Institute; Office of Cancer Communications; Bldg. 31, Rm. 10A18; 9000 Rockville Pike; Bethesda, MD 20014. Telephone: national, (800) 638-6694; Maryland, (800) 492-6600.

5. **Sense in the Sun.** 1976. 6 pp; brochure. Audience: General.

The public is urged to avoid overexposure to the sun and to see a doctor if early symptoms of skin cancer appear. **Cost:** free. **Order No.:** 2611.

Source: American Cancer Society, local units.

6. **The Sun and Your Skin.** 1977. 11 pp; brochure. Audience: General.

Gaining the benefits of sunbathing without hazardous overexposure is emphasized. Ultraviolet sun rays and tanning methods are discussed with gradual exposure recommended. A table classifies brand-name sun preparations as sunscreens, sun blocks, physical barriers, artificial tanners, temporary stains, or lubricating moisturizing agents. **Cost:** $0.40; bulk rates.

Source: American Medical Association; Order Dept. OP-319; 535 N. Dearborn St.; Chicago, IL 60610. Telephone: (312) 751-6126.

7. **You, Your Dermatologist and Cancer of the Skin.** 1975. 6 pp; brochure. Audience: General.

Cancer of the skin is the most common cancer of man. The pamphlet emphasizes that most skin cancers can be cured if detected early, and that since the sun's ultraviolet rays are the chief cause of skin cancer, overexposure should be eliminated or prevented by protective clothing or lotions. **Cost:** 50 copies, $7.50; inquire about larger quantities.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954.

Prevention and General Information: Non-Print Materials

8. **Sense in the Sun.** [Motion Picture]. 1965. 1 reel: 14 min.; sound; color; 16 mm; also available in Spanish. Audience: General; Spanish-speaking.

Through the story of a fisherman who developed skin cancer and was cured, basic information about skin cancer is presented. Prevention and early detection are emphasized. **Cost:** loan, free. **Order No.:** English, 2331; Spanish, 2331.19.

Source: American Cancer Society, local units.

9. **Sense in the Sun.** [Radio Spots]. American Cancer Society, Delaware Div., Inc. 1975. 1 audiotape: 120 sec.; reel-to-reel. Audience: General.

The series of radio spots was developed for a summer campaign. The Delaware Division will provide the spots to other areas; reference to Delaware can be removed if desired. The spots are: Going to the Beach, Out in the Sun, Protection in the Sun, Sense in the Sun, Something New for Under the Sun, and Tennis Anyone? **Cost:** free to radio stations.

Source: American Cancer Society, Delaware Div., Inc.; Academy of Medicine Bldg.; 1925 Lovering Ave.; Wilmington, DE 19806. Telephone: (302) 654-6267.

10. **Sun and Your Skin.** [Motion Picture]. M. B. Sulzberger; J. H. Epstein; J. M. Knox; K. C. Smith; R. B. Stoughton. 1974. 1 reel: 27 min.; sound; 16, 8, and Super 8 mm. Audience: Schools; Community Groups; General.

The effects of sunlight on the skin are described, with emphasis on obtaining the pleasure and benefits of relaxation in the sun while reducing the risks. **Cost:** $175; rental (16 mm film only), $15. **Order No.:** 57.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954.

11. **Sun and Your Skin.** [Motion Picture]. Lawren Productions; Coppertone. 1974. 1 reel: 27 min.; sound; color; 16 mm. Audience: Junior High School Students and above.

The film shows action shots of people sunbathing and gives advice for safe sunning. It provides a scientific explanation of the tanning process and discusses the danger of skin cancer due to overexposure. Cleared for television. **Cost:** loan, free.

Source: Modern Talking Pictures; 2323 New Hyde Park Rd.; New Hyde Park, NY 11040. Telephone: (516) 437-6300.

Professional Education

Epidemiology and Etiology: Non-Print Materials

12. **Dermatoses in Blacks.** [Videocassette]. J. A. Kenney. 1972. 1 reel: 38 min.; sound; black and white; 3/4". Audience: Dermatologists.

The lecture reviews dermatoses in blacks. Characteristics differentiating black from white skin are identified and illustrated with electronmicrographs. The program notes that basal cell carcinoma and several other skin conditions are rare among blacks. Melanoma, which occurs in blacks at the same incidence rate as in whites, is discussed. **Cost:** rental, $30; sale, $90. **Order No.:** 72-120.

Source: Emory University; A. W. Calhoun Medical Library; Woodruff Memorial Bldg.; Atlanta, GA 30322. Telephone: (404) 329-5817.

13. **Geriatric Dermatology.** [Slides]. R. Jackson; J. E. Adam. 1974. 100 slides; color; 2" x 2"; with booklet. Audience: Dermatologists.

Common skin disorders found in older age groups are illustrated. Emphasis is given to diseases that occur as a result of aging and to those tumors that are most common in patients over 60 years of age, such as malignant melanoma, leukoplakia, basal cell carcinoma, and solar keratoses. **Cost:** $75. **Order No.:** 02368.

Source: Medcom, Inc.; 1633 Broadway; New York, NY 10019. Telephone: (212) 765-6162.

14. **Sun and Your Skin.** [Videocassette]. H. Donsky; J. Nethercott. 1974. 1 cassette: 22 min.; sound; color; 1/2" EIAJ and 3/4" U-Matic. Audience: Medical Students; Physicians.

The impact of sunlight on human skin is described, along with the skin's reaction to long- and short-wave ultraviolet light. Ways to protect the skin, sun allergies, and some abnormal reactions to sunlight are also discussed. **Cost:** $100; rental/preview, $20 for two weeks, applicable to purchase.

Source: University of Toronto Faculty of Medicine; Medical Sciences Bldg.; Toronto, Ontario; Canada M5S 1A8. Telephone: (416) 978-6302.

Clinical Diagnosis and Management

15. **Cancer of the Skin: Biology, Diagnosis, Management.** Edited by R. Andrade, et al. 1976. 2 vols. 1661 pp; text; illus. Audience: Dermatologists.

The comprehensive text stresses a multidisciplinary approach to skin cancer with close collaboration among dermatologists, pathologists, surgeons, and radiotherapists. After reviewing the anatomy of normal skin, the book covers all types of skin cancers, current research topics, carcinogenesis, transplantation biology, epidemiology, genetic susceptibility, laboratory techniques, and aggressive tumor therapy (including cryotherapy, immunotherapy, chemotherapy, and reconstructive plastic surgery). **Cost:** $90.

Source: W. B. Saunders, Co.; 218 W. Washington Sq.; Philadelphia, PA 19105. Telephone: (215) 574-4700.

16. **Diagnosis and Management of Common Skin Cancers.** S. L. Gumport; M. N. Harris; A. W. Kopf. 1974. 12 pp; brochure; illus. Audience: Physicians.

Characteristic features of the three most common types of skin cancer, basal cell carcinoma, squamous cell carcinoma, and malignant melanoma, are discussed and illustrated. Two tables list: (1) incidence, clinical characteristics, and common sites; and (2) danger signals suggestive of malignant transformation in pigmented nevi. **Cost:** free. **Order No.:** 3373.

Source: American Cancer Society, local units.

17. **Early Detection of Primary Cutaneous Malignant Melanoma.** M. C. Mihm, Jr.; T. B. Fitzpatrick; L. Brown; J. W. Raker; R. A. Malt; J. S. Kaiser. 1973. 8 pp; brochure; illus. Audience: Physicians; Dermatologists.

Traditional clinical descriptions of melanoma have tended to focus on its late stages, when the prognosis is poor. The pamphlet emphasizes instead, the clinical features of its earlier, less invasive stages when there is a greater probability of cure. The major positive signs that suggest malignant change are variegated color, irregular border, and irregular surface. Diagnostic features are based upon observation and photographic documentation of patients. Eighteen annotated color photographs constitute a detailed diagnostic atlas of melanoma's early clinical signs. **Cost:** free. **Order No.:** 3313.

Source: American Cancer Society, local units.

18. **Malignant Melanoma Factsheet.** 1977. 2 pp; factsheet. Audience: Physicians.

A definition of malignant melanoma is given, along with a brief description of three frequently-occurring types. Information about symptoms, diagnosis, treatment, staging, and prognosis is presented. **Cost:** free.

Source: The University of Texas System Cancer Center; M. D. Anderson Hospital and Tumor Institute; Cancer Information Service; 6723 Bertner Ave.; Houston, TX 77030. Telephone: (713) 792-3363.

19. **Malignant Melanoma of the Skin and Mucous Membrane.** G. W. Milton; V. J. McGovern; M. G. Lewis. 1977. 174 pp; monograph. Audience: Dermatologists.

The pathology and clinical features of malignant melanoma are discussed in detail, particularly the problems relating to diagnosis. The clinical history, both of the primary site and metastases, is stressed. Also covered are treatment, including immunology and immunotherapy; melanoma in pregnancy; care of the melanoma patient; and care of the dying. **Cost:** $29.

Source: Longman, Inc.; 19 W. 44th St.; New York, NY 10036.

20. **Skin, Heredity, and Malignant Neoplasms.** H. T. Lynch. 1972. 299 pp; text. Audience: Dermatologists.

Genetic principles are reviewed in context with the critical evaluation of dermatologic signs that reveal the presence of cancer. **Cost:** $20.

Source: Medical Examination Publishing Co., Inc.; 65-36 Fresh Meadow Lane; Flushing, NY 11365. Telephone: (212) 463-1052.

21. **Skin Tumors of the Foot: Diagnosis and Treatment.** S. J. Berlin. (PMS Series, Vol. 3, ed. by M. D. Fielding.) 1974. 240 pp; monograph; illus. Audience: Dermatologists.

Hyperkeratotic lesions and related skin growths, nevi and malignant lesions, and tumors of the pedal skin and related connective tissue are discussed. **Cost:** $24.50.

Source: Futura Publishing Co., Inc.; 295 Main St.; P. O. Box 298; Mount Kisco, NY 10549. Telephone: (914) 666-3505.

22. **Tumors of the Skin: A Programmed Instruction Course.** W. P. Coleman, III; C. Graf; J. D. Knoepp; R. F. Ryan. Revised 1973. 128 pp; text. Audience: Medical Students.

The self-instruction text for the medical student gives guidelines for the diagnosis and treatment of skin tumors, both malignant and benign. Basal cell

carcinoma, squamous cell carcinoma, and melanoma are presented in depth. **Cost:** $1.50.

Source: Tulane University; Medical Bookstore; 1430 Tulane Ave.; New Orleans, LA 70112. Telephone: (504) 588-5263.

Clinical Diagnosis and Management: Non-Print Materials

23. **Cancer.** [Audiocassette]. E. J. Beattie; L. J. Humphrey. 1973. 9 cassettes: 60 min. each. Audience: Dermatologists; Surgeons.

The nine-hour postgraduate course discusses melanoma and skin cancer, urologic cancer, gynecologic cancer, and lung cancer. **Cost:** $65. **Order No.:** 0075.

Source: American College of Surgeons; ACS/Clinitapes; 55 E. Erie St.; Chicago, IL 60611. Telephone: (312) 664-4050.

24. **Cancer of the Skin.** [Motion Picture]. V. H. Witten; M. J. Jurkiewicz; G. B. Snyder. 1967. 1 reel: 18 min.; sound; color; 16 and 8 mm. Audience: Physicians.

This film shows the differential diagnosis of skin neoplasms. Characteristic lesions are identified to aid in distinguishing basal cell carcinoma from squamous cell carcinoma, and in differentiating these from other skin lesions, benign or malignant. Etiologic factors such as sunlight, other forms of radiation, certain chemicals, and scar-producing trauma are discussed, along with preventive measures. The importance of recording the size and location of skin growths and of biopsy of all suspicious lesions is emphasized. **Cost:** loan, free. **Order No.:** 3747.

Source: American Cancer Society, local units.

25. **Clinical Dermatology.** [Filmstrip]. 1972. 80 frames: 29 min.; sound; color; with audiocassette or LP record. Audience: Nurses; Medical Students.

The program briefly describes the anatomy and physiology of the skin and its accessory organs as an aid in identifying varieties of skin diseases through their effects on the epidermis. Descriptions are provided for bacterial infection, parasitic infestation, and benign and malignant skin tumors. **Cost:** with cassette, $75; with record, $70. **Order No.:** 1004.

Source: Trainex Corp.; P. O. Box 116; Garden Grove, CA 92642. Telephone: national, (800) 854-2485; California, (800) 472-2479.

26. **Clinical Dermatology.** [Slides-Tape]. R. H. Brodkin. 1970. 102 slides: 40 min.; sound; color; 2" x 2"; with audiocassette and booklet. Audience: Medical Students; Physicians.

A variety of skin diseases commonly encountered in clinical practice is explored. The tumors described include hemangiomas, port wine angioma, pyogenic granuloma, pigmented nevi, malignant melanoma, and leukoplakia. The program concludes with a presentation of the cutaneous manifestations of lymphoma and leukemia. **Cost:** $95. **Order No.:** 02010.

Source: Medcom, Inc.; 1633 Broadway; New York, NY 10019. Telephone: (212) 765-6162.

27. **Clinical Oncology Grand Rounds: A New Approach to Malignant Melanoma.** [Videocassette]. J. Gutterman. 1976. 1 cassette: 56 min.; sound; color; 3/4". Audience: Dermatologists; Physicians.

No abstract available. **Cost:** $36.50. **Order No.:** 533-1-76.

Source: M. D. Anderson Hospital and Tumor Institute; Dept. of Medical Communication; Texas Medical Center; Houston, TX 77030. Telephone: (713) 792-6746.

28. **Contemporary Aspects of Malignant Melanoma.** [Slides-Tape]. B. Cady; S. L. Moschella; M. A. Legg. 1974. 100 slides: 60 min.; sound; color; 2" x 2"; with audiocassette and booklet. Audience: Dermatologists; Surgeons.

The need for early detection of malignant melanoma as a prerequisite for better prognosis is stressed. Differential diagnosis, clinical presentation, pathologic staging, and treatment are discussed. **Cost:** $95. **Order No.:** 02361.

Source: Medcom, Inc.; 1633 Broadway; New York, NY 10019. Telephone: (212) 765-6162.

29. **The Differential Diagnosis of Pigmented Skin Tumors.** [Motion Picture]. Queensland Melanoma Project, Brisbane, Australia. 1969. 1 reel: 14 min.; sound; color; 16 mm. Audience: Physicians.

The film is intended to help medical practitioners recognize malignant melanoma clinically. In a diagrammatic fashion, it indicates the histological features of several pigmented tumors and discusses their clinical features. The program stresses the importance of a history of recent change in a pre-existing or newly developed mole. Examples of the disease at various stages and in various sites are shown. **Cost:** 2-day rental, $10. **Order No.:** 05385.

Source: American Medical Association Film Library; c/o Association Films, Inc.; 600 Grand Ave.; Ridgefield, NJ 07657. **Or:** the nearest AMA library.

30. **Early Diagnosis of Malignant Melanoma.** [Motion Picture; Videocassette]. W. H. Clark; T. B. Fitzpatrick; M. C. Mihm, Jr. 1968. 1 reel: 24 min.; sound; 16, 8, and Super 8 mm, videocassette. Audience: Dermatologists; Physicians.

Stressing the importance of examination of the skin by every physician, this film demonstrates differential features of the three main kinds of malignant tumors of pigment-forming cells, with guidelines for their early recognition by the non-specialist and criteria for their prognosis. **Cost:** film, $175; videocassette, $110; rental (16 mm film only), $15. **Order No.:** 49.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954. **Or:** 16 mm version, free loan from National Medical Audiovisual Center; Station K; Atlanta, GA 30333. Telephone: (404) 526-3561.

31. **Malignant Melanoma: Biology, Diagnosis, Therapy.** [Slides]. L. Nathanson. 1974. 100 slides; color; 2" x 2"; with booklet. Audience: Dermatologists; Physicians.

The program presents a broad overview of malignant melanoma. The lecture and text emphasize the clinical behavior of the lesion and its immunobiologic aspects. Diagnosis and differential diagnosis are explained, and the prognosis and clinical course are discussed. The review of therapy includes surgery, radiotherapy, chemotherapy, and immunotherapy. **Cost:** $75. **Order No.:** 02299.

Source: Medcom, Inc.; 1633 Broadway; New York, NY 10019. Telephone: (212) 765-6162.

32. **Malignant Melanoma: Etiology, Natural History and Conventional Therapy.** [Slides-Tape]. M. J. Mastrangelo. 1973. 21 slides: 22 min.; 2" x 2"; with audiocassette. Audience: Medical Students; Physicians.

Recent advances in the study of malignant melanoma are reviewed. **Cost:** $16.40; rental, $10.

Source: University of Pennsylvania; School of Medicine Library - G2; Attn: Audiovisual Dept.; Philadelphia, PA 19174. Telephone: (215) 243-5815.

33. **Malignant Melanoma of the Choroid.** [Videocassette]. F. H. Davidorf. 1975. 1 cassette: 58 min.; sound; color; 3/4". Audience: Dermatologists; Physicians.

The natural history, differential diagnosis, and management of malignant melanoma of the choroid are discussed and illustrated. Emphasis is placed on the ophthalmoscopic characteristics of malignant melanoma, and on the roles of visual field exams, ultrasonography, fluorescein angiography, and

radioisotope studies in diagnosis. Prognosis based on tumor cell type, size, and extrachoroidal extension is also covered, as well as methods of treatment including enucleation and conservative management. **Cost:** $472.

Source: The Ohio State University College of Medicine; Medical Audio Visual and Television Center, Rm. 243; School of Allied Medical Professions Bldg.; 1583 Perry St.; Columbus, OH 43210. Telephone: (614) 422-3323.

34. **Management of Inoperable Cancer.** [Audiocassette]. A. C. Aisenberg; V. T. DeVita; R. M. Kelley; J. M. Kiely. 1972. 1 cassette: 60 min. Audience: Physicians.

Cerebral metastases, gastrointestinal tract cancer, and metastatic malignant melanoma are among the cancers discussed. **Cost:** $5.40. **Order No.:** IM-19-11.

Source: Audio-Digest Foundation; 1577 E. Chevy Chase Dr.; Glendale, CA 91206. Telephone: (213) 240-7500.

35. **Melanoma—A New Disease, a New Approach.** [Audiocassette]. 1975. 3 cassettes: 60 min. each. Audience: Surgeons; Dermatologists.

The tapes cover current concepts in the staging of melanoma, the clinical significance of Hutchinson's freckle versus superficial spreading melanoma or nodular melanoma, treatment (including the scope of resection and the lymph node dilemma), adjuvant therapy, transit metastases, and immunobiology. **Cost:** $22.50. **Order No.:** 0304.

Source: American College of Surgeons; ACS/Clinitapes; 55 E. Erie St.; Chicago, IL 60611. Telephone: (312) 664-4050.

36. **Melanomas: Diagnosis and Treatment.** [Motion Picture]. R. J. McKenna; L. W. Guiss; R. W. Woods. 1973. 1 reel: 21 min.; sound; color; 16, 8, and Super 8 mm. Audience: Dermatologists; Physicians.

A large variety of malignant melanomas is shown and their natural history traced. Factors to consider in differentiating innocuous from suspicious lesions and in determining whether or not to excise them are discussed and illustrated clinically and diagrammatically. The clinical signs, symptoms, and microscopic findings of the common intradermal nevus, compound nevus, and junctional nevus are discussed. Criteria for excision, resection, amputation, bilateral removal of the lymph nodes, and chemotherapy are considered. **Cost:** loan, free. **Order No.:** 3753.

Source: American Cancer Society, local units.

37. **Melanomas of the Head and Neck.** [Audiocassette]. J. J. Conley. 1974. 2 cassettes: 60 min. each. Audience: Otolaryngologists; Surgeons.

The panel discussion on melanomas is designed as a mini-course for otolaryngologists and general surgeons. **Cost:** $15. **Order No.:** 0236.

Source: American College of Surgeons; ACS/Clinitapes; 55 E. Erie St.; Chicago, IL 60611. Telephone: (312) 664-4050.

38. **Metastasizing Basal Cell Carcinoma.** [Motion Picture; Videocassette]. C. Thomas. 1967. 1 reel: 8 min.; sound; 16, 8, and Super 8 mm, videocassette. Audience: Dermatologists.

This unusual case emphasizes the need to make a precise diagnosis through histologic examination of every obstinate ulcer, no matter where situated. Before being seen by the presenter, an ulcer of the lower leg in this patient was misdiagnosed until it was too late to prevent his death from metastases to various parts of the skin and most of the viscera. Autopsy and histologic findings confirm the cause of death. **Cost:** film, $70; videocassette, $70; rental (16 mm film only), $15. **Order No.:** 46.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954.

39. **The Nevoid Basal Cell Carcinoma Syndrome.** [Motion Picture; Videocassette]. J. B. Howell; D. E. Anderson. 1967. 1 reel: 19 min.; sound; 16, 8, and Super 8 mm, videocassette. Audience: Dermatologists.

By clinical demonstration of this genetically determined, unusual type of cancerous nevus in a father and his son, and through X-ray findings, the presenters demonstrate the skin cancers, pathognomonic pits of the palms, cysts in the jawbones, skeletal anomalies, and intra-cranial calcifications that characterize the disease. Course, prognosis, and management are discussed. **Cost:** film, $140; videocassette, $95; rental (16 mm film only), $15. **Order No.:** 39.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954. **Or:** 16 mm version, free loan from National Medical Audiovisual Center; Station K; Atlanta, GA 30333. Telephone: (404) 526-3561.

40. **Normal and Pathological Roentgen Anatomy of the Lymphatic System.** [Slides]. F. S. Alcorn; F. L. Hussey; E. J. Liebner. 61 slides; color and black & white; 2" x 2"; with study guide. Audience: Dermatologists.

The series of slides illustrates lymphangiograms and is accompanied by brief written descriptions of the material presented. Details regarding the patient's

pertinent medical history are included. The technique and equipment used in lymphography and the normal anatomy of the lymphatic system in the upper and lower extremities and the pelvis are described. Specific conditions covered include: lymphadenitis, malignant lymphoma, Hodgkin's disease, development of collateral circulation in a patient with lymphosarcoma, blockage of lymph nodes which are then filled with lymphoma, metastatic squamous cell carcinoma, carcinoma of the cervix stage II, carcinoma of the cervix stage III, carcinoma of the cervix stage IV, metastatic malignant melanoma, and carcinoma of the left breast. A list of complications that can occur with lymphography is provided. **Cost:** $22. **Order No.:** 18-2A.

Source: Micro X-Ray Recorder, Inc.; Medical Film Slide Div.; 3755 W. Lawrence; Chicago, IL 60625. Telephone: (312) 478-8560.

41. **Nursing Management of the Patient with Melanoma.** [Slides-Tape]. L. Weisbeck. 14 slides: 32 min.; sound; color; with audiocassette. Audience: Nurses.

No abstract available. **Cost:** $23.10. **Order No.:** 167432.

Source: Communications in Learning, Inc.; 2929 Main St.; Buffalo, NY 14214. Telephone: (716) 837-7555.

42. **Primary Cutaneous Malignant Melanomas: Recognition and Management.** [Slides-Tape]. A. J. Sober; T. B. Fitzpatrick; M. C. Mihm; W. H. Clark. 1975. 20 slides: 45 min.; sound; color; 35 mm; with audiocassette, clinical guidelines for evaluation and treatment, reference booklet, and self-assessment quiz. Audience: Dermatologists.

The slide-tape program presents historical perspectives and new concepts on moles and melanoma, including recent observations and practical clinical guidelines. The natural history and clinical-histopathologic classification of malignant skin melanomas are given with explanations on how to use the classification system and levels of invasion as a guideline for surgical therapy and prognostic index. **Cost:** members, $20; nonmembers, $25. **Order No.:** CCD-1.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954.

43. **Recognition and Management of Skin Lesions.** [Motion Picture]. A. B. Ackerman; H. Blank; H. W. Menn. 1971. 1 reel: 24 min.; sound; color; 16 mm. Audience: Dermatologists; Physicians.

The technique for simple punch biopsy is demonstrated, and the diagnosis of pigmented skin lesions discussed. The program focuses primarily on the clinical features that aid in the establishment of a differential diagnosis of

malignant melanoma, melanotic freckle of Hutchinson, nevus, and keratosis. Slides illustrate the salient features of each lesion. **Cost:** loan, free.

Source: Ayerst Laboratories; Attn: Medical Information Service; 685 3rd Ave.; New York, NY 10017. Telephone: (212) 986-1000, ext. 8060.

44. **Recognition and Therapy of Cutaneous Cancer.** [Slides-Tape]. H. L. Stoll. 1974. 25 slides: 23 min.; sound; color; 2" x 2"; with audiocassette. Audience: Dermatologists.

Diagnosis and treatment of skin carcinomas, specifically squamous cell and basal cell carcinomas, are analyzed. **Cost:** $24. **Order No.:** WR500-117422.

Source: Communications in Learning, Inc.; 2929 Main St.; Buffalo, NY 14214. Telephone: (716) 837-7555.

45. **Skin Cancer.** [Slides-Tape]. E. Klein. 1970. 49 slides: 22 min.; sound; color; 2" x 2"; with audiocassette and 10-page handout. Audience: Medical Students; Physicians.

Various forms of common skin cancers are examined and illustrated at different developmental stages. Specific treatment modalities are outlined. **Cost:** $38.40. **Order No.:** WR500.

Source: Communications in Learning, Inc.; 2929 Main St.; Buffalo, NY 14214. Telephone: (716) 837-7555.

46. **Skin Cancer.** [Videocassette]. C. McBride. 1974. 1 cassette: 59 min.; sound; color; 3/4". Audience: Dermatologists; Medical Students.

Various types of skin lesions are discussed. Origins, specific characteristics, local and metastatic disease, and treatment are covered. **Cost:** $36.50. **Order No.:** 180-1-74.

Source: M. D. Anderson Hospital and Tumor Institute; Dept. of Medical Communication; Texas Medical Center; Houston, TX 77030. Telephone: (713) 792-6746.

47. **Skin Cancer.** [Videocassette]. J. L. Smith, Jr. 1973. 1 cassette: 46 min.; sound; color; 3/4". Audience: Dermatologists; Medical Students; Physicians.

This program, part of a four-day intensive course in medical oncology, reviews the natural history, diagnosis, therapy, and clinical management of skin cancer. **Cost:** $36.50. **Order No.:** 61-1-73.

Source: M. D. Anderson Hospital and Tumor Institute; Dept. of Medical Communication; Texas Medical Center; Houston, TX 77030. Telephone: (713) 792-6746.

48. **Skin Cancer: Recognition and Treatment.** [Slides-Tape]. G. D. Weinstein. 1973. 100 slides: 80 min.; sound; color; with audiocassette and booklet. Audience: Medical Students; Physicians; Dermatologists.

Common cutaneous tumors are presented with emphasis on characteristic clinical features distinguishing malignant from benign lesions. Appropriate diagnostic and therapeutic measures are also discussed. The program covers benign lesions, premalignant lesions, and malignant and similar appearing lesions. **Cost:** $95. **Order No.:** 02152.

Source: Medcom, Inc.; 1633 Broadway; New York, NY 10019. Telephone: (212) 765-6162.

49. **Skin Tumors.** [Slides]. L. J. Swinyer. 1976. 50 slides; color; 2" x 2"; 35 mm. Audience: Medical Students; Physicians.

Skin tumors likely to be seen in daily practice are illustrated. The selection includes various nevi, benign growths, precancers, cancers, pre-melanomas, melanomas, and tumors resulting from systemic diseases. **Cost:** $35. **Order No.:** POW-D1.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954.

50. **Special Tumors.** [Slides]. 9 slides; color; 2" x 2". Audience: Podiatrists.

Various skin tumors of the foot are illustrated, including melanoma, squamous cell epithelioma, and granuloma pyogenicum. **Cost:** $0.50 each.

Source: American Podiatry Association; Audiovisual Dept.; 20 Chevy Chase Circle, N. W.; Washington, DC 20015. Telephone: (202) 537-4992 or 537-4900.

51. **Tumors of the Skin: Malignant or Benign? Part One, Epidermal Tumors.** [Slides-Tape]. A. W. Kopf; M. B. Sulzberger. 1976. 80 slides: 23 min.; sound; color; with audiocassette. Audience: Medical Students; Physicians.

Benign growths, precancers, cancers, and pseudocancers are illustrated by artwork and photography. Frequently occurring tumors such as seborrheic keratoses, actinic keratoses, basal and squamous cell carcinomas, keratoacanthomas, and other benign and malignant skin growths are described. The need for routine skin examination, the high index of suspicion that must be maintained, and the steps to take when confronted by a potentially malignant tumor are emphasized. **Cost:** $85. **Order No.:** ABC-7.

Source: Institute for Dermatologic Communication and Education; 2785 Jackson St.; San Francisco, CA 94115. Telephone: (415) 929-8011.

52. **Tumors of the Skin: Malignant or Benign? Part Two, Non-Epidermal Tumors.** [Slides-Tape]. A. W. Kopf; M. B. Sulzberger. 1976. 80 slides: 28 min.; sound; color; with audiocassette. Audience: Medical Students; Physicians.

Skin tumors of the muscles, nerves, lymphatics, fat, connective tissue, and blood vessels are described, and bulky and flat hemangiomas differentiated. Benign, premalignant, and malignant tumors of pigment cells are emphasized, with warning signs of transformation to malignancy portrayed in detail. Survival rates given for different types of melanomas reveal why delay in diagnosis and removal can be fatal; consultation and biopsies of all suspicious pigmented lesions are necessary. **Cost:** $85. **Order No.:** ABC-8.

Source: Institute for Dermatologic Communication and Education; 2785 Jackson St.; San Francisco, CA 94115. Telephone: (415) 929-8011.

53. **Vascular Tumors of the Skin.** [Slides]. J. D. Maberry. 1971. 101 slides; color; 2" x 2"; with booklet. Audience: Medical Students; Dermatologists.

Hemangiomas, granuloma pyogenicum, telangiectasias, lymphangioma, and Kaposi's sarcoma are illustrated and described in detail. **Cost:** $75. **Order No.:** 02078.

Source: Medcom, Inc.; 1633 Broadway; New York, NY 10019. Telephone: (212) 765-6162.

Pathology: Non-Print Materials

54. **Adnexal Tumors of the Skin: Tumors of the Apocrine Gland, Eccrine Gland and Basal Cell Epithelioma.** [Slides]. A. H. Mehregan. 1971. 60 slides; color; 2" x 2"; with booklet. Audience: Dermatologists.

Various adnexal tumors of the skin are illustrated, including dermal duct tumor, mixed tumor of the skin, and basal cell epithelioma. **Cost:** $24. **Order No.:** 12-IB.

Source: Micro X-Ray Recorder, Inc.; Medical Film Slide Div.; 3755 W. Lawrence; Chicago, IL 60625. Telephone: (312) 478-8650.

55. **Adnexal Tumors of the Skin: Tumors of the Epidermis, Sebaceous Gland and Hair Follicle.** [Slides]. A. H. Mehregan. 1971. 60 slides; color; 2" x 2"; with booklet. Audience: Dermatologists.

Various types of adnexal tumors of the skin are illustrated. A complete classification is included in Table 1 according to level of differentiation and structural resemblance. **Cost:** $24. **Order No.:** 12-1A.

Source: Micro X-Ray Recorder, Inc.; Medical Film Slide Div.; 3755 W. Lawrence; Chicago, IL 60625. Telephone: (312) 478-8650.

56. **Atlas of Dermatopathology: Melanocytic Nevi and Related Tumors of the Skin.** [Slides]. R. J. Reed. 1975. 90 slides; color; 2" x 2"; with text. Audience: Dermatologists; Pathologists.

The morphologic features of the cutaneous melanocytic nevi and melanomas are examined with emphasis on their natural history. The adventitial melanocytic nevus, spindle cell nevus, pigmented spindle cell nevus, halo nevus, sclerosing reticular nevus, giant hair nevus, and melanocytic blastoma are discussed. Lentiginous variants, superficial spreading melanoma, nodular melanoma, and patterns and levels of invasion are also pictured as ways of characterizing the cutaneous melanocytic hamartomas and of determining their potential threat to the host. **Cost:** $93.75. **Order No.:** 15-1-013-00.

Source: American Society of Clinical Pathologists; 2100 W. Harrison St.; Chicago, IL 60612. Telephone: (312) 738-1336.

57. **Cutaneous Malignant Melanoma: A Histologic Classification and Levels of Dermal Invasion.** [Videocassette]. E. Soule. 1974. 1 cassette: 28 min.; sound; color; 3/4". Audience: Physicians; Pathologists.

A histologic demonstration of cutaneous malignant melanoma uses the microscopic classification of Wallace H. Clark and Vincent J. McGovern. The degree of tumor invasion is described in terms of the microscopic anatomic levels of the dermis. Illustrative case material is presented. **Cost:** rental, $7.50.

Source: Mayo Clinic; Audiovisual Center, N-9; Plummer Bldg.; 200 First St., S. W.; Rochester, MN 55901. Telephone: (507) 282-2511, ext. 2328.

58. **Histological Typing of Skin Tumours.** [Slides]. R. E. J. Seldam; E. B. Helwig. 1974. 150 slides; color; 2" x 2"; with 58-page monograph. Audience: Dermatologists; Pathologists.

Skin tumors are classified by anatomical site, histological type, and degree of malignancy to insure standard nomenclature, flexibility, and ease of

coding. The set is part of a series by the World Health Organization. **Cost:** $96; text only, $42.40. **Order No.:** 70-1-012-00; text only, 70-1-012-20.

Source: American Society of Clinical Pathologists; 2100 W. Harrison St.; Chicago, IL 60612. Telephone: (312) 738-1336.

59. **Malignant Atrophying Papulosis (La Papulose Atrophiante Maligne).** [Motion Picture; Videocassette]. Degos; Sidi; Bourgeois-Spinasse; Arouete. 1962. 1 reel: 9 min.; sound; 16, 8 and Super 8 mm, videocassette. Audience: Dermatologists.

The salient features and course of malignant atrophying papulosis, a dermatosis that is usually so rapidly fatal that it is seldom seen, are revealed in a living patient. Two of the authors who originally described the entity present the case, demonstrating lesions on the skin, eye, penis, and, by laparoscopy, on the large intestines. The film received the Scientific Film Award — 1964 and serves as a unique historical record by authorities who first recognized the disease. **Cost:** film, $70; videocassette, $70; rental (16 mm film only), $15. **Order No.:** 3.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954.

60. **Malignant Melanoma: Histologic Interpretation and Prognostication.** [Videocassette]. R. J. Reed; W. H. Clark; M. C. Mihm. 1975. 1 cassette: 30 min.; sound; color; 3/4"; with supplementary booklet, 35 mm slides, and test/answer form. Audience: Dermatologists; Pathologists; Physicians.

The program correlates the development of melanomas with regard to type, invasiveness, and prognosis. It explains how to locate and identify histologic landmarks relating to tumor growth and the levels of invasion in the skin, how to correlate levels of invasion with prognosis of melanoma, how to identify the typical types of melanoma by variant and level of invasion, and how to identify examples of immunologic response to growth of a melanoma. **Cost:** $250; preview, no charge. **Order No.:** 47-1-008-00.

Source: American Society of Clinical Pathologists; 2100 W. Harrison St.; Chicago, IL 60612. Telephone: (312) 738-1336.

61. **Melanotic Lesions of the Skin.** [Videocassette]. R. W. Sagebiel. 1973. 1 cassette: 30 min.; sound; color. Audience: Dermatologists; Pathologists.

A variety of gross and microscopic pathological sections are used to outline the nature and treatment of melanotic lesions. The histogenesis and biological

behavior of malignant melanoma are discussed, as well as a therapeutic classification of the lesion. The clinical and histological features of each classification are given along with prognostic indices. **Cost:** $125. **Order No.:** 07812.

Source: Professional Research, Inc.; 660 S. Bonnie Brae St.; Los Angeles, CA 90057. Telephone: (213) 483-6220, (800) 421-0200.

62. **Pathology of Malignant Melanoma.** [Slides-Tape]. R. A. Donato; Y. Kim. 1973. 63 slides: 45 min.; sound; 2" x 2"; with audiocassette. Audience: Medical Students; Pathologists.

Recent advances in the pathology of malignant melanoma are reviewed and discussed. **Cost:** $33.20; rental, $10.

Source: University of Pennsylvania; School of Medicine Library - G2; Attn: Audiovisual Dept.; Philadelphia, PA 19174. Telephone: (215) 243-5815.

63. **19th Zola Cooper Memorial Clinicopathologic Seminar in Dermatology 1972.** [Slides-Tape]. 1972. 203 slides: 100 min.; sound; color; 2" x 2"; with 2 audiocassettes and guide. Audience: Pathologists; Dermatologists; Medical Students.

Thirty dermatological cases are illustrated and accompanied by discussions of the history, histopathology, physical findings, laboratory data, clinical course, and treatment of each case. Among the case presentations are: in situ epidermoid carcinoma, Bowen's type; squamous cell cancer in a patient with leukemia; squamous cell carcinoma with lymphocytic leukemia infiltrate; pityriasis lichenoides acuta eventuating in mycosis fungoides; nonspecific reactive granulomatous process—malignant lymphoma—lymphomatoid papulosis; tick-bite granuloma; basal cell carcinoma of the vulva; multiple trichoepitheliomas; congenital neuroblastoma of the adrenals with metastases to skin and other organs; congenital giant pigmented nevi with melanoma; and malignant melanoma, histological level II. **Cost:** loan, free.

Source: Eli Lilly and Co.; Audio-visual Film Library; Indianapolis, IN 46202.

64. **20th Zola Cooper Memorial Clinicopathologic Seminar in Dermatology 1973.** [Slides-Tape]. 1973. 240 slides: 120 min.; sound; color; 2" x 2"; with 2 audiocassettes and guide. Audience: Pathologists; Medical Students; Dermatologists.

Twenty-nine dermatological cases are illustrated, including: acute lymphoblastic leukemia and malignant reticulosis of the skin; reticulum cell sarcoma; spindle cell malignant melanoma; Hutchinson's freckle grading into a nodular malignant melanoma; pigmented basal cell carcinoma; resolving keratocanthoma; hemangiopericytoma; mucinous carcinoma of the scalp; squamous cell carcinoma; and granuloma faciale reaction associated with skin cancer. The history, histopathology, physical findings, laboratory data, clinical course, and treatment of the cases are discussed in the text. **Cost:** $90.

Source: Eli Lilly and Co.; Audio-visual Film Library; Indianapolis, IN 46202.

Skin Manifestations of Systemic Malignancies: Non-Print Materials

65. **Cutaneous Lesions: Signs of Internal Diseases.** [Slides-Tape]. E. Epstein; E. Epstein, Jr. 1972. 100 slides: 90 min.; sound; color; 2" x 2"; with audiocassette and booklet. Audience: Dermatologists; Internists.

The slide-tape presentation describes and demonstrates cutaneous lesions associated with systemic diseases. The etiology and treatment of various lesions are described, including xeroderma pigmentosum, radiodermatitis, squamous cell carcinoma, metastatic carcinoma, melanoma, sarcoma, mycosis fungoides, leukemia of the skin, reticulum cell sarcoma, multiple myeloma, and basal cell nevus syndrome. **Cost:** $95. **Order No.:** 02080.

Source: Medcom, Inc.; 1633 Broadway; New York, NY 10019. Telephone: (212) 765-6162.

66. **Cutaneous Signs of Internal Malignancy.** [Videocassette]. 1975. 1 cassette: 16 min.; sound; color; 3/4" U-Matic. Audience: Dermatologists; Physicians.

A dermatologist demonstrates the workup for a patient with a suspected underlying malignancy. **Cost:** rental, $20; purchase, $50 (available to subscription members only).

Source: Network for Continuing Medical Education; 15 Columbus Circle; New York, NY 10023. Telephone: (212) 541-8088.

67. **Cutaneous Vascular Phenomenon Associated with Functioning Carcinoid Tumor.** [Motion Picture; Videocassette]. R. R. Kierland. 1962. 1 reel: 3 1/2 min.; sound; 16, 8, and Super 8 mm, videocassette. Audience: Dermatologists.

The film follows the course of the typical flushing caused by the release of vasoactive chemicals in the functioning carcinoid patient. The evolution and involution of the deep, sharply demarcated, characteristic flushing is depicted in natural sequence. **Cost:** film, $45; videocassette, $70; rental (16 mm film only), $15. **Order No.:** 16.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954.

Treatment

68. **Cryosurgery of Tumors of the Skin and Oral Cavity.** S. A. Zacarian. 1973. 312 pp; book; 268 illustrations; 18 tables. Audience: Dermatologists; Physicians; Surgeons.

The text is designed to familiarize the physician with the fundamentals of cryogenesis and to acquaint the surgeon with the technique of cryosurgery for the management of external neoplasms and neoplasms of the oral cavity. **Cost:** $26.75.

Source: Charles C. Thomas; 301-327 E. Lawrence Ave.; Springfield, IL 62703. Telephone: (217) 789-8980.

Treatment: Non-Print Materials

69. **Advances in Cancer Therapy.** [Audiocassette]. P. P. Carbone. 1975. 1 cassette: 60 min. Audience: Dermatologists; Physicians.

This tape covers therapeutic considerations in malignant melanoma and such topics as a combined modality approach to breast cancer therapy, improved results in Hodgkin's disease therapy, and current treatment in non-Hodgkin's lymphomas. **Cost:** $5.40. **Order No.:** IM-22-11.

Source: Audio-Digest Foundation; 1577 E. Chevy Chase Dr.; Glendale, CA 91206. Telephone: (213) 240-7500.

70. **Chemoimmunotherapy of Melanoma.** [Videocassette]. E. Hersh. 1975. 1 cassette: 53 min.; sound; color; 3/4". Audience: Dermatologists.

The staging and history of melanoma are reviewed. Administration of BCG through scarification is discussed, along with clinical characteristics important to a good prognosis for immunotherapy, combination chemo-immunotherapy, specific examples of response rates, and immunopotentiating activities of BCG in patients with melanoma. **Cost:** $36.50. **Order No.:** 390-2-75.

Source: M. D. Anderson Hospital and Tumor Institute; Dept. of Medical Communication; Texas Medical Center; Houston, TX 77030. Telephone: (713) 792-6746.

71. **Clinical Applications of Lasers.** [Motion Picture]. L. Goldman; J. Rockwell; F. L'Esperance; H. Remky; S. Stellar. 1970. 1 reel: 19 min.; sound; color; 16 mm. Audience: Dermatologists; Surgeons; Opthalmologists.

The clinical application of lasers in dermatology, opthalmology, and surgery is demonstrated. The program describes laser light and how it is used to vaporize tissues. Among the cases presented are the removals of a port wine stain, a tattoo, a melanoma, and a brain tumor. **Cost:** loan, free. **Order No.:** 31.

Source: Upjohn Co.; Professional Film Library; 7000 Portage Rd.; Kalamazoo, MI 49001. Telephone: (616) 323-6572.

72. **Clinical Approaches to Skin Cancer.** [Audiocassette]. E. Klein; J. M. Vaeth; M. S. Litwin; E. J. Van Scott; C. M. McBride; J. Salk. 1973. 1 cassette: 60 min. Audience: Dermatologists.

Various treatment approaches to skin cancer are discussed including radiotherapy, surgery, chemotherapy, and immunotherapy. Specific cancers covered are basal and squamous cell carcinomas, mycosis fungoides, and malignant melanoma. **Cost:** $5.40. **Order No.:** IM-20-3.

Source: Audio-Digest Foundation; 1577 E. Chevy Chase Dr.; Glendale, CA 91206. Telephone: (213) 240-7500.

73. **Dermatologic Treatments That Almost Always Work.** [Slides-Tape]. R. L. Dobson. 1973. 17 slides: 32 min.; sound; color; 2" x 2"; with audiocassette. Audience: Dermatologists.

A series of skin tumor cases is presented with discussions of differential diagnosis and treatment modalities. **Cost:** $19.20. **Order No.:** WR 500 117335.

Source: Communications in Learning, Inc.; 2929 Main St.; Buffalo, NY 14214. Telephone: (716) 837-7555.

74. **Excision and Dissection in Continuity for Melanoma.** [Motion Picture]. H. W. Southwick. 1971. 1 reel: 29 min.; sound; 16 mm. Audience: Dermatologists; Surgeons.

The preferred treatment of malignant melanoma is the excision and dissection in continuity of the primary tumor and the regional lymph nodes. In this case the primary tumor was so located that a subtotal parotidectomy and radical neck dissection in continuity were performed. **Cost:** rental, $10. **Order No.:** DG-1174.

Source: Davis and Geck; Surgical Film Library; 1 Casper St.; Danbury, CT 06810. Telephone: (203) 743-4451.

75. **Immunotherapeutic Approach to Malignant Melanoma.** [Slides-Tape]. M. J. Mastrangelo. 1973. 30 slides: 39 min.; 2" x 2"; with audiocassette. Audience: Dermatologists; Medical Students.

Recent advances in the treatment of malignant melanoma with immunotherapy are reviewed. **Cost:** $20; rental, $10.

Source: University of Pennsylvania; School of Medicine Library G-2; Attn: Audiovisual Dept.; Philadelphia, PA 19174. Telephone: (215) 243-5815.

76. **Malignant Melanoma.** [Audiocassette]. 1972. 1 cassette: 60 min. Audience: Surgeons.

A panel of surgeons discusses malignant melanoma. Covered in the presentation are diagnostic aspects, including staging, standard therapy (routine wide excision and lymph node dissection), perfusion with or without surgery, and immunotherapy. **Cost:** $7.50. **Order No.:** 0018.

Source: American College of Surgeons; ACS/Clinitapes; 55 E. Erie St.; Chicago, IL 60611. Telephone: (312) 664-4050.

77. **Management of Malignant Melanoma of the Trunk.** [Motion Picture]. 1970. 1 reel: 32 min.; sound; color; 16 mm. Audience: Dermatologists; Physicians.

The film presents a rationale of regional node dissection for melanoma of the trunk. The anatomic choice of appropriate lymph node base and techniques of dissection are demonstrated. **Cost:** rental, $10. **Order No.:** M-2233-X.

Source: Davis and Geck; Surgical Film Library; 1 Casper St.; Danbury, CT 06810.

78. **Office Treatment of Skin Cancer.** [Videocassette]. 1974. 1 cassette: 19 min.; sound; color; 1/2". Audience: Dermatologists; Physicians.

The diagnosis and treatment of potential malignancy and skin cancer are demonstrated. The use of fluorouracil, biopsy, curettage and electrodesiccation, total excision, cryosurgery, irradiation, and chemosurgery are described. **Cost:** rental, $20; purchase, $30 (available to subscription members only).

Source: Network for Continuing Medical Education; 15 Columbus Circle; New York, NY 10023. Telephone: (212) 541-8088.

79. **Plastic Maxillofacial Surgery: Tumors of the Skin and Soft Tissue.** [Audiocassette]. R. F. Ryan. 1974. 6 audiocassettes: 60 min. each. Audience: Surgeons.

Tumors of the skin and soft tissue are discussed. **Cost:** $45. **Order No.:** 0194.

Source: American College of Surgeons; ACS/Clinitapes; 55 E. Erie St.; Chicago, IL 60611. Telephone: (312) 664-4050.

80. **Regional Perfusion for Malignant Melanoma.** [Motion Picture]. G. D. Williams; G. S. Campbell. 1970. 1 reel: 15 min.; sound; color; 16 mm. Audience: Dermatologists; Surgeons.

The film describes and demonstrates step-by-step the technique of regional perfusion for malignant melanoma. A patient with melanoma of the calf and with clinically negative lymph nodes is treated by extremity perfusion with phenylalanine nitrogen mustard and wide local excision of the melanoma. This approach attacks the primary lesion and exposes the lymphatics and the cutaneous and subcutaneous tissues to the phenylalanine nitrogen mustard. **Cost:** loan, free. **Order No.:** M-2222-X.

Source: National Medical Audiovisual Center; Station K; Atlanta, GA 30333. Telephone: (404) 526-3561. **Or:** rental, $10; Order No.: DG-1072. Davis and Geck; American College of Surgeons; Surgical Film Library; 1 Casper St.; Danbury, CT 06810. Telephone: (203) 743-4451.

81. **Skin Grafting: Practical Demonstration of Proven Techniques.** [Motion Picture]. J. B. Brown; M. P. Fryer. 1961. 1 reel: 33 min.; sound; color; 16 mm. Audience: Surgeons; Medical Students.

The film demonstrates the use of free skin grafts. The importance of properly applied dressings to the grafted areas and the donor site is stressed. Of the six clinical patients shown, one is treated for an invasive basal cell carcinoma at the inner canthus of the eye, one for cancer of the nose, and another for cancerous radiation lesions of both hands. **Cost:** loan, free. **Order No.:** M-2083-X.

Source: National Medical Audiovisual Center; Station K; Atlanta, GA 30333. Telephone: (404) 526-3561. **Or:** sale, Davis and Geck; American College of Surgeons; Surgical Film Library; 1 Casper St.; Danbury, CT 06810. Telephone: (203) 743-4451.

82. **Surgery for Dermatologic Problems.** [Audiocassette]. J. W. Curtin. 1977. 2 cassettes: 60 min. each. Audience: Surgeons; Dermatologists.

Recorded at the American College of Surgeons Clinical Congress, 1977, the tapes cover a panel discussion of benign, malignant, systemic, and miscellaneous dermatologic problems amenable to surgery. **Cost:** $15. **Order No.:** 0541.

Source: American College of Surgeons; ACS/Clinitapes; 55 E. Erie St.; Chicago, IL 60611. Telephone: (312) 664-4050.

83. **Temporal Melanoma with Left Parotidectomy and Left Radical Neck Dissection.** [Motion Picture]. 1964. 1 reel: 14 min.; sound; color; 16 mm. Audience: Medical Students; Surgeons.

Excision of the primary, temporal lesion with split-thickness skin graft to cover the area is accomplished by total parotidectomy (with preservation of facial nerve) and radical neck dissection to complete the removal of all available lymph nodes contained in the area of lesion. The patient is shown one year after surgery with good function and cosmetic result. **Cost:** rental, $7.50.

Source: Mayo Clinic; Audiovisual Center, N-9; Plummer Bldg.; 200 First St., S.W.; Rochester, MN 55901. Telephone: (507) 282-2511, ext. 2328.

84. **Transfer Factor and Cancer Immunotherapy.** [Slides-Tape]. H. S. Lawrence. 1975. 49 slides: 45 min.; sound; 35 mm; with audiocassette and self-evaluation quiz. Audience: Dermatologists.

Transfer factor is a convenient shorthand to describe the active principles in circulating human lymphocytes. Human lymphocytes, when extracted and dialysed, could transfer immunity from the immune donor to the non-immune recipient. The basic principles of transfer factor and their clinical applications are discussed. **Cost:** members, $28; nonmembers, $34. **Order No.:** AAD4.

Source: American Academy of Dermatology; P. O. Box 552; Evanston, IL 60204. Telephone: (312) 869-3954.

85. **Treatment of Melanoma.** [Slides-Tape]. E. D. Holyoke. 9 slides: 38 min.; sound; color; 2" x 2"; with audiocassette. Audience: Dermatologists; Medical Students.

No abstract available. **Cost:** $19.60. **Order No.:** 117430.

SUBJECT INDEX

Adnexal tumors: 54, 55
see also Glandular tumors

Aged: 13

Anatomy: 15, 25, 40
see also Histology; specific sites

Atrophic papulosis: 59

Basal cell carcinoma: 12, 13, 16, 22, 24, 38, 39, 44, 51, 52, 54, 63, 64, 72, 81
see also Epidermoid carcinoma; Skin ulcers

Benign tumors: 22, 24, 25, 36, 48, 49, 51, 52, 82

Biopsy technique: 15, 24, 43, 78

Blacks: 12

Blastoma, melanocytic: see Melanoma

Carcinoid tumors: 67

Chemotherapy: 15, 31, 36, 70, 72, 76, 78, 80

Choroid tumors: see Eye

Cryosurgery: 15, 68, 78
see also Surgery

Early detection: 5, 7, 8, 17, 28, 30, 52

Epidemiology: 12, 15, 16
see also Risk factors

Epidermoid carcinoma: 51, 63
see also Basal cell carcinoma; Squamous cell carcinoma

Epithelioma: 50, 54, 63

Etiology: 1, 2, 4, 15, 24, 32, 46, 65

Eye: 33, 59, 81

Foot: 21, 50

Genetics: 15, 20, 63

Glandular tumors: 54, 55, 63
see also Adnexal tumors

Grafts: 81, 83
see also Surgery

Granuloma pyogenicum: 26, 50, 53

Head and neck: 37, 64, 68, 74, 79, 81 83,

Hemangiomas: 26, 52, 53, 64
see also Vascular tumors

Histology: 17-19, 28, 29, 32, 33, 35, 36, 38, 42, 47, 54-58, 60, 61, 63, 64, 70, 76
see also Anatomy

Hutchinson's freckle: see Pigmented nevus

Immunotherapy: 15, 19, 31, 35, 70, 72, 75, 76, 84

Inoperable tumors: 34

Kaposi's sarcoma: 53

Keratoacanthoma: 51, 64
see also Squamous cell carcinoma

Keratosis: 13, 21, 43, 51
see also Precancerous conditions

Lasers: 71

Leukemia: 26, 63-65

Leukoplakia: 13, 26
see also Precancerous conditions

Lymphangioma: 53
see also Vascular tumors

Lymphatic system: 40, 52, 63

Lymphography: 40

Lymphoma: 26, 40, 63, 69

Melanocytic nevi: see Pigmented nevus

Melanoma: 12, 13, 16-19, 22, 23, 26-37, 40-43, 49, 50, 52, 56, 57, 60, 61, 63-65, 69-72, 74-77, 80, 83, 85

Moles: 29, 42
see also Pigmented nevus

Multiple myeloma: 65

Mycosis fungoides: 63, 65, 72

Nevus: 21, 36, 39, 43, 49, 56, 65
see also Pigmented nevus

Nursing care: 41

Papulosis, atrophic: see Atrophic papulosis

Pigmented nevus: 16, 26, 29, 35, 43, 56, 63, 64
see also Moles; Nevus

Plastic surgery: 15, 79
see also Surgery

Port wine angiomas: 26, 71
see also Telangiectasia

Precancerous conditions: 2, 48, 49, 51, 52
see also Keratosis; Leukoplakia; Xeroderma pigmentosum

Pregnancy: 19

Prevention: 2, 3, 5-11, 14, 24

Radiation lesions: 24, 65, 81

Radiotherapy: 15, 31, 72, 78

Research: 2, 4, 15

Risk factors: 2
see also Epidemiology

Skin ulcers: 38
see also Basal cell carcinoma

Solar keratosis: see Keratosis

Squamous cell carcinoma: 16, 22, 24, 40, 44, 50, 51, 63-65, 72
see also Keratoacanthoma; Epidermoid carcinoma

Sunlight: 5-11, 14, 24

Surgery: 15, 31, 36, 37, 42, 72, 74, 76-78, 80, 82
see also Cryosurgery; Grafts; Plastic surgery

Systemic malignancies, skin manifestations: 26, 49, 63, 65-67, 82

Telangiectasia: 53
see also Port wine angiomas

Terminal care: 19, 33, 38

Treatment, unspecified: 1, 2, 4, 18, 19, 21, 28, 32, 33, 35, 39, 44-48, 61, 63-65, 73, 85

Ulcers, skin: see Skin ulcers

Ultraviolet radiation: see Sunlight

Vascular tumors: 52, 53, 67
see also Hemangiomas; Lymphangioma

Xeroderma pigmentosum: 65
see also Precancerous conditions
